

Machine Learning Demo

Machine Learning Demo

```

1 // Use a Machine Learning Model trained in MATLAB
2 // 18-January-2022
3
4 // Wm. Wilson
5 // MathWorks Application Engineering, Novi MI
6
7 // Built using MATLAB R2021b
8 // Copyright 2021 The MathWorks, Inc.
9
10
11 // The goal of this work is to predict the occurrence of diabetes given
    patient information.
12

```

Cmd 2

Example dataset

```

1 // Note: you must put the file "diabetes_data.csv" on DBFS for this
    example to work (see line 10).
2 // This needs to be done before running this notebook! See README.md
    for more details.
3
4 // Example (.csv) data
5 val df_PatientData = spark
6     .read
7     .options(Map(
8         "inferSchema"->"true",
9         "delimiter"->>";",
10        "header"->"true"))
11     .csv("/example/MLDemoData/diabetes_data.csv")
12
13 printf("\nDataFrame representing sample patient data\n\n")
14 df_PatientData.show(3, false)
15

```

▶ (3) Spark Jobs

▶  df_PatientData: org.apache.spark.sql.DataFrame = [age: integer, gender: string ... 15 more fields]

DataFrame representing sample patient data
